

# ImmunoSpot® S6 Lite M2

Simplicity reimagined - the S6 Lite is a portable, light-weight device with low-energy consumption. Powered by CTL's new Studio Suite and backed by CTL's flagship ImmunoSpot® Single-Color Suite Software - the S6 Lite can go anywhere – take it home and plug it into a laptop. Specifically designed for start-up labs or hard-to-reach places, the S6 Lite is the only viable solution for portable, whole well visible-light imaging and analysis. It's ideally suited for reading single-color T and B cell ELISPOT assays.
