

CMVpp65 (495-503) Peptide (frozen, ready-to-use peptide solution)

Catalog #: CEF32-07-001

Product Name: CMVpp65 (495-503) Peptide

Peptide Sequence: NLVPMVATV

Packaging Size: 1.5ml per vial, peptide dissolved in serum-free CTL-Test™ Medium.

Concentration: 10nm

Description: CMVpp65 (495-503) is an HLA-A2-restricted synthetic peptide derived from human cytomegalovirus.

Activity: CMVpp65 (495-503) stimulates peptide-specific CD8+ memory T cells to produce IFN- γ .

Recommended Use: After thawing, the reagent is a 2x ready-to-use working solution (concentration 10nm). When working in 96-well plates, add 100 μ l of peptide solution to 100 μ l of cells per well. The cell concentration should be 100,000 – 800,000 cells/well.

Storage: Keep frozen at -20°C to -80°C.
